Idaho Noxious Weed Conference 2019**

MEETINGS

**Feb 26 Twin Falls UPRR
March 1 Twin Falls Organic Grower Meeting**

Next Meeting: April 11, 2018 Gooding County

OLD BUSINESS

ISDA Cost Share Application:

Had a telephone interview on the Cost Share Application on Jan 29, went well, will have to update our mapping to continue.

Mobile Computer Purchase:

Got a bid form Territorial Supplies, \$4551.95. In 2008 this computer cost \$6,000.

Union Pacific RR Update

Spoke with Mary Beth Farley at the Weed Conf. in Boise. She laid out what the UPRR Requires. There has been a meeting set up to meet with her and the powers to be February 26th in Twin Falls. Most of Southern Idaho Weed Supts. that deal with UPRR will attend.

NEW BUSINESS

Income/Expense Statement for 2018

What to do with remaining \$\$\$. I suggest paying out \$20K to each county, leaving \$13646.70.

Weed Mapping Applications

Visited with Jason at Twin Falls Weed Department about the program they use. ODK-Open Data Kit is what they use.

Civil Penalties Title 22 Chapter 24 Idaho Code

Latah County has pursued this and has provided a template for use. Latah County has NO equipment or personnel to do treatments or enforcements. See Handout Should we pursue this or go on like we have.

REPORT ON:

Weed Conference and Supts. Meetings

Attended the IAWCS Annual Meeting on Jan 14-15, received my 25 year service award. Currently there are three Supts that have served longer, Reid Smith in Minidoka Co-26 years, Curtis Monk in Power County 26 years and John Cenarussa in Blaine County 35 years. ICRMP did a presentation on Supervising Drivers, Rick Waitley spoke about professionalism and IAC Director spoke about our involvement with that organization.

INWC-Jan 16-17 Picked up some good information on Herbicide Resistance. Interesting to note there has been no new chemistry introduced for vegetation control in 25 years. It costs 250 million to bring new chemistry to the market. What is happening is companies are purchasing other companies patents and them mixing known herbicides together/renaming them and putting those out.
